A WEEK ON 'CHANGE.

New Discoveries Underground Followed by Sprinting Above.

New Discoveries Underground Followed by Sprinting Above.

The week on the mining exchange closed on the transfer of 161,797 shares of stock, for which \$47,698 it was paid; the day on the sale of 26,203 shares, for \$554.83, and with the condition more buoyant than at any period in many moons. Lower Mammoth, which opened on Monday last at 32, afforded another demonstration of the money to be made on the right side of the market, and during the session yesterday sold freely up to 61 cents, while Uncle Sam, which sold at 31 at the opening of the week, found a market up to 41½, with 41 bid for Yankee Con. New York, while not so buoyant, was firm and in good demand up to 55 cents, at which figure it had opened the week, while to bids around \$4.8 Butter-Liberal came out as if the job presses had started again. Boston Con., with ground for the first unit in its 10,000-ton concentrator to be broken in a short time, sold up to \$3.25, with Con. Mercur, whose resources are in materially improved condition, changing hands around \$6 cents, while Daly-Judge did business at \$6.75 and Daly West around \$14. Daly was weak, notwithstanding the draft being made on theores of its Mazeppa fissure, and while \$1 was all to be had for Eagle & Blue Bell, the man who is reveiling in its possession declined to fix a price at which he was ready to part with it. Grand Central closed an offering at \$3 and Mammoth at \$1.40, while Ontario relaxed its grip on a small lot around \$2.20, with the venerable Horn Silver refusing to budge at less than \$2.10. Sacramento, by which a \$5000 distribution will be made in a few days, did a light business at 10 cents, with a single lot of Swansea coming out to a 30-cent bid, while Wabash was traded in around \$1.55 and Victoria up to \$2.07½. From 75 cents Columbus Con was advanced to \$5 on favorable reports from mines and mill, while Comstock, on the heels of a 10-cent assessment, sold at 20 cents. Silver Shield and Tetro were weak, as was Carisa, although from each came encouraging reports, the day and week c

TO IRISH MOUNTAIN.

With a Consignment of Dynamite, Joseph Bush Departs.

Joseph Bush Departs.

To inaugurate systematic work upon the properties of the Hiko Bell Mining company on Irish mountain, out of Hiko. Nev. Joseph Bush, its general manager, departed for camp again last night, to be fellowed by a big consignment of explosives and other supplies. Of the future of the undertaking, in which Manager Bush has experienced no difficulty in interesting a number of wealthy Salt Lakers, he says he has not the slightest doubt. Indeed, he expects to be able to begin active production of ore at an early day. Few have had Mr. Bush's experience in the diggings, and mining men generally will rely upon his operations at Irish mountain to add materially to its growth.

MAYNE'S RICH ROCK.

Five Thousand Pounds From Which Much Gold Is Promised.

Two and one-half tons of ore, valued at \$400 a ton, will be shipped today from the Mayne lease No. 6 to the Kadish sampler at Columbia, says the Sun of Goldfield, Nev. In addition to this phenomenally rich rock, 40 sacks of ore, running better than \$200 a ton, will be sent to the sampler. The entire shipment will net \$16,000. Simultaneously the Davis-Loftus lease No. 5, on the same property, will make a shipment to the sampler of twenty-five tons of ore, running approximately \$300 a ton.

NEW STRIKE IN TINTIC'S EAGLE

Ores Now Appear at Thousand Feet.

Extent of the Channel at That Depth Is Yet to Be Determined.

Gold Ores of Sensational Value in Level Above Verify Pioneer's Predictions.

The management of the Eagle & Blue Bell of Tintic has intercepted the orebearing channel on the 1000-foot level and at a distance of 112 feet from the shaft. At that station, at all events, the shift which was lowered on Friday night drove its key into the hole for which it has been forging its way through the stratum of limestone, and with conditions at this point identical with those above, there is nothing to indicate other that results will be as pronounced. There is the rock carrying copper, gold and sliver on the latest level, and to open it up as above work will be dispatched, said Capt. MacVichie, who is being congratulated on one more achievement in the diggings, along the most vigorous lines. The condition 200 feet above, or on the 800-foot level, is one which compares favorably with any in the camp, and, while developments are not so extensive, the channel presents all the characteristics of those that have placed the Centennial Eureka, its neighbor, among the wonders of the earth. Not only have the contents of this channel responded with an average that foretells with positive emphasis the ultimate distribution of dividends, but in it is occurring a class of ore to which the original owner locked forward when he admonsished those who were gathered about his bedside as death was about to claim him that Eagle & Blue Beil was the most valuable of the assets in his estate. A verification of this was found in samples from a full face of ore exposed Friday on the 800-foot level, the returns certifying to as much as \$180 in gold, in addition to sensational contents in silver, with fine percentages of copper. It is upon this level that active stoping will begin next month, when the carnings should be materially increased. At present the management is drawing upon the ores of the 600 and 700 levels that are responding freely and affording good margins.

Tonopah-Goldfield Stocks, at a distance of 112 feet from the shaft At that station, at all events, the shift

Hornblower & Weeks's Copper Letter. Special to The Tribune,

BOSTON, Mass., July 22 -Copper shares BOSTON, Mass., July 2—Copper shares sold off fractionally on account of weakness in New York market, but the demand was remarkably good and offerings were easily absorbed. Local conditions continue to improve, and, with continued strength in the metal, brokers generally are relying on steadily increasing activity.

BOSTON CON. RAILWAY.

Survey for the Line to Bostonia Approaching Completion.

proaching Completion.

The Bingham Bulletin says the narrow gaugo railroad that will convey 10,000 tons of ore daily from the Boston Con. mine to the mill at Bostonia, will be built on a 2 per cent grade and without switchbacks. The preliminary survey is being made by Col. Moore, the veteran railway pathfinder, under the direction of W. H. Henderson, and will be completed to Bostonia within a week. The route runs down the north side of the mountain at an elevation considerably higher than the Copper Belt, and the descent to the valley is made on the Dalton & Lark side. While the grade will be easy, an extreme curvature is required, and the road will be one of the crookedest in the world.

The New England made another shipment of concentrates this week.

Oscar Hoistein this week shipped two cars of ore from his Niagara lease.

The Greeley this week finished a shipment of three cars of fine silver-lead ore. Andrew Dalstrom and Jake England have located three claims in Butterfield canyon.

At the Butler-Liberal twenty men are

canyon.

At the Butler-Liberal twenty men are

now employed, and the work is confined chiefly to drifting for a connection be-tween the shaft and the old Butler work-ings, in which it is expected a good ore body will be encountered. body will be encountered.

After a delay of several days, due to breaks in machinery, the Kempton mill is now ready to go into commission.

A new shaft is to be started on the Maxwell group, which will be located just below the Yampa ore bins. The purpose is to open up the Yampa vein, which, it is thought, cuts across the Maxwell ground, and which, it is expected, will be encountered at a depth of about 200 feet.

ORES AND BULLION.

Settlements in the Open Market Smack of Inaccuracies.

THE ICE MAN has been around and made it cool at Saltair for Pioneer Day. In the ore and bullion market the week's settlements were reduced to \$442,900, this

aggregate compared with \$462,400 for the previous one. Of receipts at the furnaces and builton going forth the returns will appeal to the more observant as a provokingly inaccurate refers. Certainly they do not sustain the claims of rallways that their tonnages from the diggings are unprecedented, that the output of builton, with the refineries its destination, exceeds that of any previous period in the history of the valley furnace. However, there is the comforting reflection that the record of the ultra-copper furnaces is excluded from the exhibit. The days returns "Indicate" settlements amounting to \$52,000. McCornick & Co. reporting them as they follow: Buillion, \$29,00; gold, silver, lead and copper ores, \$22,190.

In the metal market silver ruled at \$3% cents an ounce, lead at \$3,5004 50 per hundred pounds, and casting copper at 14% cents a pound.

IS SEEKING GOLD.

Capt. Eade on His Way Into Camps

Capt. J. A. Eade, long the field representative of the great house of Leiter, came in from the East last night upon his way to Nevada's regions of gold as the expert emissary of a wealthy Cleveland syndicate. There are few camps in the Western country with which the Captan is not conversant, and that from the diggings toward which he is headed he will draw a capital prize those who have followed his operations are prepared to believe. He is not entering the region as one to whom the promoter has commended something. On the contrary, his condition is a receptive one, and in the event he sees something to meet his wants another vigorous undertaking in the new field may be relied on. With headquarters in this city for several years, Capt. Eade has made many friends, who are making his brief sojourn an agreeable one. of Nevada.

King Con.'s Hoist Ready to Start

Historic Machine by Which Many Millions Were Raised to Go Into Commission

of the King Consolidated at Park City has been equipped, and with which the management will be able to fathom its possessions to depths corresponding with any in the great camp of bonanzas, will go into commission tomorrow, said Solou into commission tomorrow, said Solon Spiro, manager of the undertaking, yesterday. The plant is one with a history. In the drama of those diggings it has played one of the most conspicuous parts. It was the first steam hoist to be installed there, its moorings at the Ontario's No. 2 shaft. That was in 1882, when Hon. David Keith, now president of the great Silver King, was foreman of the ontario. The event was the occasion for a period of revelry in which every inhabitant of the camp participated, said Mr. Keith, the shaft-house in which it had been installed the rendezvous. For many years it served the old bonanzs, and during that period raised from the depths a volume of ore of the value of many, many millions. The completion of the long tunnel on the property affording a more economical outlet, the use of the hoist was suspended. Some time ago it was purchased by the management of the King Consolidated, and is now ready to go into commission. With it the sinking of the shaft, now at a depth of 80 feet, will be resumed, and until the wealth for which the search is being prosecuted shall be attained, sinking will continue. With this Manager Spiro promises to prosecute this undertaking most vigorously. To get it to the properties of the company as many as twenty-eight animals were required, and the hope is expressed that it will be followed by an era of production as great as was that which characterized its service at the Ontario. Spiro, manager of the undertaking, yes-

Sees Possibility of a Mine on the Big Cattle Ranch.

W. J. Barnett, for several years promi-nently identified with the mining ex-change, and for two years with the Hagenbarth company's big cattle ranch, Hagenbarth company's big cattle ranch, Sonora, Mex, came up from the South yesterday to visit with his father. Upon the ranch in the Southern republic, Mr. Barnett says he experiences no lack of playground. On the contrary, there is included in the company's domain no fewer than 2,200,000 acres, much of which is now under fence, and upon which as many as 15,000 head of cattle are grazing, with the herd to ultimately number 35,000 or more.

While no attempt has yet been made to prospect the realm embraced in the company's holdings for the metals, the mineralization of it at a number of places, says Mr. Barnett, induces him to believe that it is underlaid by copper and gold. Upon all sides, indeed, mining is being profitably conducted, among the neighbors the Greene Copper company at Cannanea, with its tremendous output of the red metal, associated with gold and silver. With a possibility of developing similar results the cattle company will no doubt provide means for exploratory work as soon as the paramount purpose shall have While no attempt has yet been made to been achieved. Mr. Earnett, whose reception on brokers' row is being made a cordial one, will leave for Idaho the present week to inspect conditions on the same syndicate's ranch in that State.

Under New Ownership.

Under New Ownership.

The first number of the Bingham Bulletin, with H J. Robinson as its editor and proprietor and Charles T. Harte as manager, has made its appearance, and while the new owner has not been afforded time in which to consummate all that has been planned for its improvement, the advance along those lines has been a striking one. Mr. Robinson, by whom the Bulletin has been acquired, is a publisher and a newspaper man of much experience and that the columns of the Bulletin shall be made to reflect the resources of the great camp of copper will be his utmost endeavor. That Charles T. Harte has been induced to remain as manager of the Bulletin, its new owners and its readers are to be congratulated.

Mr. Nash's Death Cause for Gloom

Has Been an Ardent Exponent of Utah's Merits for a Great Number of Years.

timely death of Edward W. Nash, president of the American Smelting and Refining company, can be no keener than was it among those to whom he had endeared himself in this city and with many of whom he had been associated in smelting and other enterprises. Since the birth of smelting, modern smelting in this valley, his figure has been a prominent one, while of the American Smelting and Refining company he has been president since its organization. In this city he was esteemed by none more profoundly than by those engaged in smelting, while not a producer with whom he was brought in contact but ever after entertained toward him the greatest admiration. Toward the latter his attitude was always a friendly one, with the former his relations were uniformly, fair and honorable, however acute the rivairies. To the grief-stricken wife and family many expressions of sincere sympathy were dispatched during the day. Perhaps none feit more keenly the blow so unexpectedly dealt than did Mr. A. Hanauer, with him he was so intimately associated for many years, or Hon. W. S. McCornick, who had also been identified with many of his enterprises. In the American's family circle he was most affectionately esteemed, said Mr. Daniel Guggenheim, who was prefoundly affected by the news of his death. Not one, indeed, whose affection he did not command, and wherever a furnace is operated, wherever mining is pursued will there be the keenest sorrow. For this State and its great industry he has done much and to him is it largely indebted for the prominence it has attained among the smelting centers. The industry of no State has sustained the loss of a more ardent expenent. contact but ever after entertained toward

COLTON'S MINERAL WAX

Operations at Property Suspended for Several Weeks.

Fred Howe, manager of the Pleasant C. Fred Howe, manager of the Pleasant Valley Ozocerite company's properties and plant at Colton, this State, departed for the East during the day to confer with his associates. He will absent himself until September, and on his return will start up on a most energetic scale. While the mining and reduction of ores in which this property occurs is a new industry, said Mr. Howe, there is much to encourage the belief that it will be a most profitable one. On its acquisition at Colton the company has expended a considerable amount, and while the marketing of the mineral wax has not yet begun on active lines, an eager reception has awalted it for several years.

WILL CARRY MAILS

Alta Service to Be Over the Continental's Tramway.

In future the mail for those employed at the properties of the Continental Mining company. Alta, will be forwarded over the company's aerial tramway, this permission having been obtained from the department at Washington. It will greatly expedite the delivery of mail and reduce the time at least three hours, said Mr. Crowther during the day.

At the mines and mills of the camp, whose activities are hourly increasing, Manager Crowther reports every condition up to expectations, with a larger number upon the payrolls than at any period, perhaps, in the exploitation of the old camp.

Uncle Sam's New Ore.

A report from Superintendent Griggs of the sole Sam to Manager Dern during the day so the condition on the 500-feet level is hour improving and that the drift is now pro gressing in ore of good quality. In addition to the carbonates of lead, galena is now appearing. The intention is to continue across the mass to the other wall when the opening up of the channel in each direction will be hurried.

Mining Notes.

Clarence K. McCornick and Tony Jacobson off for Alta yesterslay morning to inquire into anditions at the Columbus Con. mines and

The return of Hon. A. W. McCune, orig-inator of the great undertaking by which the Cerro de Pasco mines of Peru have been placed among the foremost of copper producers, is scheduled for tomorrow.

A number of shareholders in the Lower Mammoth will visit the property tomorrow, at which time the level admitting to the new strike will have been cleaned out.

Joseph Dederichs, under whose direction the Bingham & New Haven's aerial tram is to be constructed, leaves for camp to inaugurate construction tomorrow morning. Director George A. Block of the Montgomery-Shoshone mines at Rhyolite, Nev., says shoth-er consignment of high-grade ore in being pre-pared for Sait Lake valley smelters.

Matt Rhoads, who has been giving his at-ention to interests at Bingham, has returned o town to remain.

Bingham Bulletin: Manager Cates of the loston Con. has been the recipient of many ongratulations this week over the announce congratulations this week over the annuncement of his engagement to Miss Helen Gillespie, daughter of Mr. and Mrs. James Gillespie, and one of Salt Lake's most charming society girls. The wedding will occur in September. An addition is being built to Mr. Cates's house at the mine, which will be transformed into a most attractive home for the bride.

C. H. Doolittle, manager of the Bingham & Now Haven's Bingham interests, left for camp again yesterday morning. George Light, identified with the mining camps of Colorado for many years, is down from Butte, Mont.

Herbert Shaw came in from Colorado yes-terday morning and last night departed for Elko, Nev. to close up a deal involving min-ing property.

Samples of antimonial copper from locations south of Little Cottonwood recently acquired by Col. John Reeves of the Oregon Short Line, indicate a most promising discovery.

There will be no call on the mining ex-change until Tuesday. Its votaries are going to observe Monday with the oldest inhabitants. President Mucklow, whose departure was delayed by a desire to issue a circular letter on conditions at the Majostic Copper company's properties, left for Portland last night, accompanied by his bride.

GET OUT of the hot city and GET IN line for a dip at Saltair July 24.

NOTICE OF ASSESSMENT.

Little Chief Mining and Milling company. Principal place of business at Sait Lake City. Utah.

Notice is hereby given that at a meeting of the board of directors, held on the 30th day of June, 1905, an assessment of one (1) cent per share (being assessment No. 22) was levied upon the cagital stock issued and outstanding of the corporation, payable immediately to J. Obernation, and office, No. 161 S. Main street, Sait Lake City, Utah.

Any stock upon which this assessment shall remain unpaid on Monday, the 31st day of July, 1905, will be delinquent and advertised for sale at public auction, and sold on Friday, the 18th day of August, 1906, to pay the delinquent assessment, together with the cost of advertising and expenses of sale.
